### Welcome Letter from our Directors

#### [Event Information & Registration](#)

One year ago, the world was only beginning to learn about COVID-19 and its impact on public health, data and research, our patients and providers, and the most vulnerable among us. Therefore, the Stanford Center for Asian Health Research and Education, the Center for Innovation in Global Health, and the Center for Population Health Sciences organized the International COVID-19 Conference, bringing together leading experts across disciplinary and national borders to share their expertise and stories. Now, one year later, we ask these same experts to tell us: What lessons have we learned from COVID-19?

**We cordially invite you to explore this question at our 2nd International COVID-19 Conference: Lessons Learned. The virtual conference will take place on Friday, May 14th, 7:30 AM to 3:30 PM (Pacific Standard Time).**

This multi-disciplinary Conference will bring together public health officials, researchers, and physicians to share lessons learned from COVID-19. Together, we endeavor to increase knowledge, empower education, and positively impact our response to this pandemic. In funding innovative research, educating promising scholars, and community outreach, we seek to improve healthcare both locally and globally.

Please join us in this bold initiative, and together we can make a difference in the continued fight against COVID-19.

Sincerely,

**Sally Shan Li, MA**
